THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Seed Research Association, Inc.

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF seventeen YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. IN THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS SPECIFIED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

13A Origin & Breeding History:

Triticum aestivum/Agropyron elongatum segregate. Single plant selection in the F_9 generation. Increased from this single plant selection and tested in clipping and field trials for greenchop, hay, silage, and pasture. L clavate headed type was observed in 1974 increase but line is self p9llinating and highly homozygous. Field approved for certification in 1974.

13B Botanical Description:

Seed is larger and more free threshing than Agropyron - more elongated and pointed at ends than most wheats. The texture is similar to that of a soft wheat but with a higher protein than most wheats. The seed germinates at a higher temperature than wheat. The juvenile form of growth is erect. The seedlings have long narrow leaves and a red coleoptile. The plant has many tillers. The leaves are yellowish green color. It usually has five leaves above ground level. The head is long and lax - 15 -22 spikelets. It has a hard, straw colored glume, short beards, and an extensive root system.

13C OBJECTIVE Description:

Matures 10 days to two weeks later than Scout wheat.
Excellent regrowth for pasture.
Good protein level as forage and grain.
Palatability of pasture equal to wheat.
Cold tolerant
Germinates most readily at temperatures above that where wheats grow most readily.
Under conditions with ample moisture and fertility growth is more or less continuous.
Shows resistance to anthracnose, wheat streak, leaf and stem rust.
It has drouth tolerance superior to most wheat.
It is self pollinating and highly homozygous.
36-45 inches tall

13D Novelty

Growth habit is weakly perennial and different from wheat or Agropyron ancestors.

Seed larger and more free threshing than Agropyron - more elongated and pointed at ends than most wheats. Seed higher in protein than most wheats.

Only commercial variety that resembles it closely is Agrotriticcum Variety 3425 which is taller, 3 to 5 days later maturing, and somewhat higher in protein in both the grain and forage when grown under the same conditions.

13E Developed by plant breeder, Kenneth L. Goertzen. and Betty L. Goertzen

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and $250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.

13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.

13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.

13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.

13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.

13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.
